COMMUNITY FORUM FOR ECONOMIC DEVELOPMENT
Mission Statement

The Community Forum seeks to promote economic development, the process of increasing living standards and opportunities for area residents. We believe that our tax resources are best used to improve the quality of life in our community, and that this is also the best way to encourage business investment. Subsidized business investment should provide community benefits and be directed to areas of need. Through education, organizing, and advocacy, we hope to open up the economic development process to greater democratic participation.
